HELLO !

In our company we deal with various projects related to photography, video, graphics, promotion, etc ... We also do social and economic research.

We could compose a successful video, survey, research, interview for you, advertise you directly or indirectly.

We are by no means limited in our imagination, so we can compile and market and publish extremely penetrating projects.

Above all, we need financial resources so that our work can be carried out with quality and independence from political issues.

Even smaller financial resources can lead to big steps.

Contact us, make contact with us, we will definitely find a suitable and successful case for you, which can greatly benefit you.

- HOW TO PROTECT YOURSELF AGAINST THE CORONAVIRUS
- COOKING RECIPES WITH HEALTHY AND QUICK PREPARATION
- CALENDAR OF SLOVENIAN BEAUTIES 2022

The year 2022 is approaching, which is expected to be much more successful than in previous years.

For all of you, we have made a VIDEO on how to effectively protect yourself from viruses.

Our big goal is how to get as many young people as possible interested in cooking, preparing their own healthy food in the fastest possible way, without artificial substances.

We need to stop the deliberate destruction of the whole world by the negative moguls, we also want to contribute and encourage our own food production in greenhouses so that they do not poison our fields and forests from planes.

Ask beekeepers what is going on, why and how catastrophic honey production is.

Immune system, enjoy healthy food, video and photo.

We present you our project, which is aimed at the awareness of young people that it is necessary to be healthy, to enjoy healthy food in order to have a good and natural immune system. No vaccination can replace this, not even the dubious vaccines that have been widely presented and researched in the world of professional medicine to be harmful and deadly.

To this end, we record recipes for quick preparation of healthy food in a natural way. Interested young people in cooking will thus learn to cook faster and easier, and the effect of the mindset will be much more conducive to healthy eating.

We also made a video with a proven method of how to protect against viruses and also against the Coronavirus. www.monarh.cc/video.htm – www.monarh.cc/photos.htm

We notice that in Slovenia there are more and more lies and deceptions about this pandemic with the Coronavirus.

The interest of healthcare and current politics to "inflate" this pandemic is incredible, and thus individuals who falsely present themselves as saviors through the media every day are completely unjustifiably enriched by coercive means.

We think and act differently.

For the year 2022, we are also preparing a new calendar with our own photographs: SLOVENIAN BEAUTIES 2022.

So, let's get back to nicer topics than you've been going through in recent years.

In 2012, I was Martina, the most popular person of the year in Slovenia.

www.predsednica.si/naj.htm

I collect sponsors of cooking recipes, girls' applications for photography and video, and orders to sell calendars.

Greetings, Boris and Martina Valenčič
